Lab Safety Training

1. <http://labsafetyworkspace.org/user/register>
 - a. Register for this site. This is an online lab training site that allows you to earn a certificate in various lab training areas. You need a certificate printed out for us in each area:
 - i. Introduction to Lab Safety
 - ii. General Lab Safety
 - iii. Biological Safety
 - iv. Chemical Safety

Each section has a guide, a video, and provides you information, then has you take a quiz. Do this and pay attention, take notes! Your lab you are working in is expecting a high level of content knowledge and behavior. You are responsible for knowing these things presented.

*Email or turn in certificates (4) to keri.polevchak@jefferson.kyschools.us, in room 310. You may not enter a laboratory until you complete the above requirements.

** Note- University of Louisville may require additional training depending on your project, so for some of you this may only be step one depending on the materials you are working with. See Ms. Polevchak, Room 310 for more details.
